

Subject: Indiana Telephone Privacy

To whom this may concern.

Being a resident of Indiana I have had the opportunity to enjoy the relaxing evenings with my family without having it interrupted by persistent unwanted phone calls. That being said, if my business contacts I associate with need to communicate with me this can be done through the US postal service or other delivery services. All my financial institutions and credit card companies have had no problem communicating with me for the past 12 to 18 months.

Today our privacy and respect for family values are taken fore granted by big business. I value the quality time I have gained back the past year with my family due to the Indiana Telephone Privacy act.

I expect Commissioner Martin, Commissioner Abernathy, Chairman, Powell, Commissioner Copps and Commissioner Adelstein to disregard the Consumer Bankers Association attempt to impose the federal "established business relationship" exemption on Indiana consumers.

Best regards,
Thomas Ewing
